

IN THE SPECIFICATION:

Pages 6 and 7, amend the paragraph starting on page 6 at line 13 and ending on page 7 at line 3 as follows:

-- Referring to the drawings, in particular to Fig. 1, a workstation 1 is connected to a TMS470 processor evaluation module 3 by a software emulator cable 5. The cable 5 connects to the TMS470 module 3 at a Jtag connector 7 on the module 3. Also on the TMS470 module 3, are connectors JP1 and JP2. These connectors connect to signal lines of the TMS470 module 3 as shown in Fig. 5. The workstation 1 is able to control the TMS470 module so that software developed for the actual TMS470 processor on the ASIC can be executed, controlled and monitored. A description of the TMS470 processor evaluation module 3 is enclosed in the appendix. Using a TMS470 processor evaluation ~~model~~ module 3 with a workstation to develop and test software for TMS470 processor it is well known to those of ordinary skill in the art and therefore no further explanation of the TMS470 processor evaluation module, or its operation is necessary.--.
